

LANC Connector is an 1/8" stereo phone plug
 Tip is the serial LANC signal
 center ring is +V unregulated
 "shield" is ground

LEDs should be low current types

Note the "Trigger" pull-up is 1000 Ohms and the rest are 10,000 Ohms.

Use the 1K resistor on whichever switch(es) you want to work as the "wake-up" button for the camcorder
